

EA-PS 8032-20 T

- 宽范围输入电压90...264 V, 带主动式PFC
- 效率高达 92%
- 输出功率: 320 W 至 1500 W
- 输出电压: 0...16 V 至 0...360 V
- 输出电流: 0...4 A 至 0...60 A
- 灵活的功率调整输出级*
- 有过压保护 (OVP)
- 有过温保护 (OT)
- 四位数显电压、电流显示器
- LED灯指示状态
- 可自动检测的远程感测端
- 模拟接口
 - 通过 0...10 V或0...5 V电压可对U / I 编程
 - 通过 0...10 V或0...5 V电压可监控U / I
- 温控风扇制冷
- 可选数字接口卡:
 - RS232, CAN, USB, GPIB (IEEE)
 - Profibus, Ethernet/LAN

- Wide input voltage range 90...264 V with active PFC
- High efficiency up to 92%
- Output power ratings: 320 W up to 1500 W
- Output voltages: 0...16 V up to 0...360 V
- Output currents: 0...4 A up to 0...60 A
- Flexible, power regulated output stage*
- Overvoltage protection (OVP)
- Overtemperature protection (OT)
- Four-digit display for voltage and current
- Status indication via LEDs
- Remote sense with automatic detection
- Analog interface with
 - U / I programmable via 0...10 V or 0...5 V
 - U / I monitoring via 0...10 V or 0...5 V
- Temperature controlled fan for cooling
- Optional, digital interface cards
 - RS232, CAN, USB, GPIB (IEEE)
 - Profibus, Ethernet/LAN

概要

EA-PS8000 T系列是一款由微处理器控制，采用最新技术设计的实验室电源。标准型号配备多种功能和特征，让用户使用起来更方便、有效。

本系列可记忆5组不同的预设值，仅需按下一按钮，即可存储及再次上载这些数值，故用户可即刻取出频繁使用的设定参数。

输入

采用主动式功率因数校正线路，使产品在90 V_{AC}至264 V_{AC}全世界宽范围输入电压下都适用。

功率为1.5 kW的型号在输入电压<150 V_{AC}时总输出功率将降至1 kW。

* 针对1 kW以上型号

General

The microprocessor controlled laboratory power supplies of series EA-PS 8000 T cover state-of-the-art technology. They already offer many functions and features in their standard version, making the use of this equipment remarkably easy and most effective.

The units are provided with a memory function for five different preset values, with the ability to save and recall these just by the push of a button. Thus frequently used settings are at immediate reach to the user.

Input

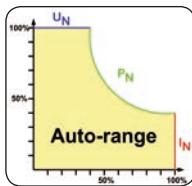

The equipment uses an active Power Factor Correction circuit to enable using it worldwide on a mains input between 90 V_{AC} and 264 V_{AC}.

The 1.5 kW models are derated, ie. power reduced, to 1 kW at input voltages less than 150 V_{AC}.

* Models from 1 kW

功率

1 kW 以上型号输出功率可灵活调整，可在低电流时输出更高的电压，或在低电压时输出更大的电流，都由最大额定输出功率来限制。因此一台该产品能涵盖广范围的应用领域。

**DC输出**

本系列有多种不同型号，可选择0...16 V至0...360 V输出电压，0...4 A至0...60 A输出电流，320 W至1500 W输出功率的型号。

输出端位于产品前板。

过压保护(OVP)

为保护连接负载，可设定一过压保护极限值(OVP)。

若输出电压超过调整极限值，输出被关断，LED灯和模拟接口发出状态消息信号。

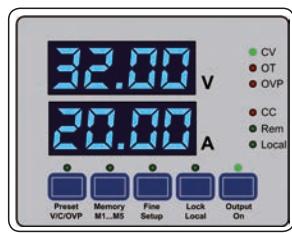

远程感测

用一条连接线将指定输入端与负载设备直接连上，可进行远程感测，以便补偿负载线上的压降。产品会自动检测输入端是否已连接，并直接稳定负载上的电压。该感测输入端位于产品前面板。

显示器和控制键

输出电压和电流清晰显示于两个4位数LED显示器上。LED灯指示产品和按钮的功能状态，为用户提供简便、舒适的操作。

两旋钮可设定输出电压、电流和OVP(过压保护)值，“fine setting”模式可进行高分辨率的调节。在“Lock”模式下按钮和旋钮都被锁定，避免无意识的设定值修改。电源开关位于产品后面板，输出关闭按钮则在前面板。

**输出值的预设**

若不想直接将设定输出值传输到输出端，可采用预设功能。

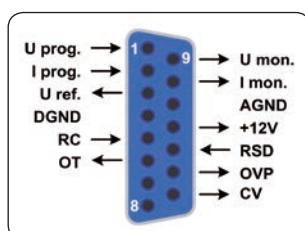

通过此功能用户可预设输出电压、电流和过压保护值(OVP)。

模拟接口

模拟接口位于产品前面板。它具有模拟输入脚，接上0 V...10 V或0 V...5 V电压，可设置0...100%的输出电压与电流。在产品设置菜单下可选。

模拟输出脚接上0 V...10 V或0 V...5 V电压，可监控输出电压与电流。此外，还有几个输入脚和输出脚，可用来控制和监控产品状态。

该接口无电隔离特性。

**Power**

Models with 1 kW or higher output power are equipped with a flexible auto-ranging output stage which provides a higher output voltage at lower output current, or a higher output current at lower output voltage, always limited to the max. nominal output power. Therefore, a wide range of applications can already be covered by the use of one unit.

DC output

DC output voltages between 0...16 V and 0...360 V, output currents between 0...4 A and 0...60 A and output power ratings between 320 W and 1500 W are available.

The output terminal is located on the front panel.

Overvoltage protection (OVP)

In order to protect the connected loads it is possible to adjust an overvoltage protection limit (OVP).

If the output voltage exceeds the adjusted limit, the output is shut off and status signals via a LED and via the analog interface will be generated.

Remote sensing

Remote sensing can be done via a dedicated input which is directly connected to the load equipment, in order to compensate voltage drops on the load cables. The power supply detects automatically if the sense input is connected and will stabilise the voltage directly at the load. The remote sensing input terminal is located on the front panel.

Displays and controls

Output voltage and current are clearly visualised on two 4-digit displays. The functional status of the unit and its buttons are indicated via LEDs, providing easier and most comfortable handling to the user.

Output voltage, current and OVP values can be set by two rotary knobs. A fine setting mode for high resolution adjustment is provided as well. With the „Lock“ mode, buttons and knobs can be locked to prevent unintentional change of settings. The main power switch is located on the back panel, an output shutdown button on the front panel.

Presetting of output values

To set output values without affecting the output condition, a preset function is implemented.

With this function the user can preset values for the output voltage, output current and overvoltage protection (OVP).

Analog interface

The connection for the analog interface is located on the front of the device. Analog inputs are available here, to set voltage and current from 0...100% in the voltage ranges 0 V...10 V or 0 V...5 V.

To monitor output voltage and current, analog outputs with voltage ranges from 0 V...10 V or 0 V...5 V can be read out. Furthermore, several inputs and outputs are available for controlling and monitoring the device status.

This interface is not galvanically isolated.

选配件

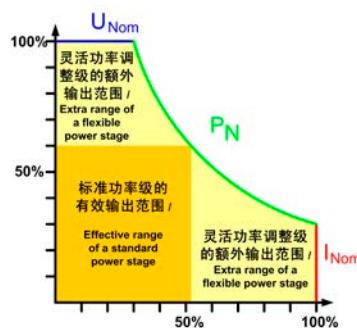

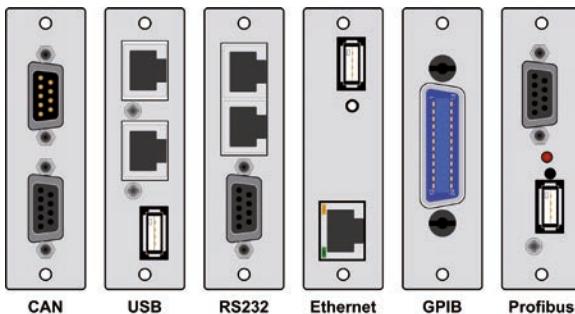

- 本系列电源可利用RS232, CAN, USB, GPIB (IEEE)、乙太网/LAN或Profibus不同的隔离数字接口，用电脑来控制。接口插槽在产品后板，方便用户插上新接口或替换当前接口。产品会自动检测接口类型，并提示需进行几步设置或不用设置。随接口卡附有适合RS232/USB/GPIB (IEEE)/Ethernet的免费Windows软件，它可控制、监控、记录数据和排序。详情请见136和142页。

- 高速跃变（仅针对1 kW以上产品，见151页）

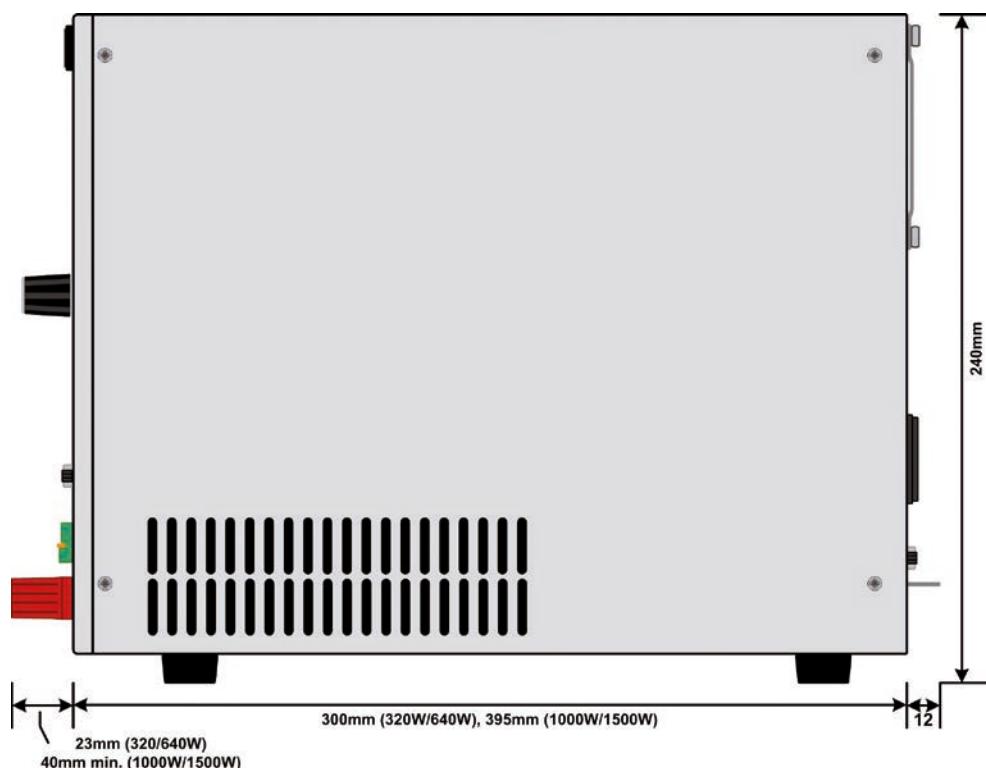

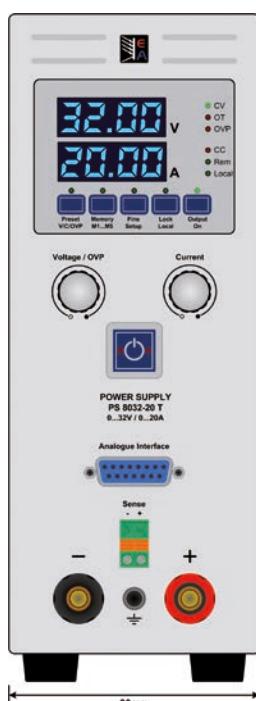

Options

- Isolated digital interface cards for RS232, CAN, USB, GPIB (IEEE), Profibus or Ethernet to control the device by PC. The interface slot is located on the rear panel, making it easy for the user to plug in a new interface or to replace an existing one. The interface will be automatically detected by the device and requires no or only little configuration. Included with the interface cards is a free Windows software for RS232/USB/GPIB/Ethernet, which provides control and monitoring, data logging and semi-automatic sequences. See pages 136 and 142.
- High speed ramping (only for models as from 1 kW, also see page 151)
